## TELECOMMUNICATIONS

Press Group are able to provide a full end to end telecommunications service offering everything from line installations, both office and mobile telephony, personalised numbers and broadband for all businesses whether you are a sole trader or multi-site PLC organisation.

## UTILITY PROCUREMENT

1

Press Group looks after around 8,000 sites across the UK giving us a high level of buying power which results in massive savings on energy procurement for all our customers

7

## UTILITIES AT HOME

Through our Gold Partnership with the energy suppliers we can provide great savings for your contracts at home through our very own price comparison portal that can be found on the website.

## WATER AUDIT

2

Due to the water market being divided into monopolised regions suppliers often invoice businesses incorrectly on a range of charges. This often goes unnoticed due to the complexity of pricing structures. We have the knowhow and experience to help out and check for any billing issues there may be prior to the water market deregulation scheduled for 2017.

6

## ELECTRICITY REDUCTIONS

The UK Electricity market is very volatile with rates changing daily making its important to manage your usage. Press Group offer a wide range of energy services and technologies ranging from solar to voltage optimization to help monitor and reduce your electricity costs.

## NEW METER INSTALLATIONS

3

Press Group are able to provide the full utilities package from start to finish on gas, electricity and water on new or existing commercial, industrial and residential building projects. We can manage the project from initial design, to utility connection, right through to negotiating the best rates and terms.

5

## GAS REDUCTIONS

With gas prices forever rising a great way to increase your bottom-line is reducing your consumption. We have many products and services that offer savings and can massively cut down your gas overheads.

## LED LIGHTING

4

LED is one of the most effective methods of reducing your electricity overheads and carbon footprint as they use up to 83% less electricity than conventional lighting. LED also lasts up to 10 times longer than the alternatives equating to a further saving on the maintenance.
